

## ***CHARTSEARCH'S CEO, CHRIS MODEZLEWSKI, SPREADS THE WORD ON CHARTSEARCH FOR B-EYE-NETWORK'S PODCAST***

### **Chris Modzelewski Gives Business Tech Solutions Expert Jill Dyché an Exclusive Scoop on ChartSearch's Groundbreaking Technology**

**West Orange, NJ – June 18, 2008 - ChartSearch Inc.**, an enterprise technology company focused on providing [data search and analysis software](#), today announced that **Chris Modzelewski**, Founder and Chief Executive Officer, recently gave a podcast interview to the **Business Intelligence Network™** (B-Eye-Network) during the firm's recent participation in **The Data Warehousing Institute (TDWI)'s** Spring 2008 World Conference, which took place on May 11, 2008 - May 16, 2008 at the Sheraton Chicago Hotel in Chicago, IL.

Jill Dyché, partner and co-founder of [Baseline Consulting](#), a professional services firm that helps companies solve problems with data, conducted the interview with Chris. Dyché, whose work has been featured in the Wall Street Journal, The Chicago Tribune, CIO Magazine, Intelligent Enterprise and Computerworld, describes ChartSearch as a “numerical search and analysis platform [that is] one to watch.”

During the podcast, which can be heard through streaming audio at [www.b-eye-network.com](http://www.b-eye-network.com), Chris provides Jill with an overview of ChartSearch and its inner working as a revolutionary user-friendly numerical search and analysis platform. He describes ChartSearch as “bringing the search driven user experience to the world of numerical analysis and business intelligence.”

Chris attributes ChartSearch's user-friendliness to its simplistic interface, which, similar to Google, is effective as it responds to an individual's natural instinct of entering search queries in natural language, rather than constructing complicated navigation pathways. Therefore, business users who may not be trained statisticians or analysts can utilize the software's search box, type in their query, and instantaneously receive the answer to their business-related questions. This innovative feature is part of Chartsearch's principle value proposition—to provide increased insight productivity, and to enable people within business organizations to make decisions faster by increasing the efficiency with which they can get access to information.

“We remove the wait times that business users have to get back a report and an analysis that today has to be manually produced,” Chris states. “By empowering users to be able to search for their numerical data, we can make their insight generation much more productive.”

The Business Intelligence Network™ focuses on business intelligence, performance management, data warehousing, data integration and data quality, serving these communities with unparalleled industry coverage and resources.

### **About ChartSearch**

ChartSearch Inc.  
347 Mt. Pleasant Avenue, Suite  
201  
West Orange, NJ 07052  
Phone (201) 984-1913  
[www.chartsearch.net](http://www.chartsearch.net)

ChartSearch is an enterprise technology company helping clients maximize their “insight productivity” through the use of a numerical search engine and real-time business intelligence platform. The company is commercializing a suite of enterprise software built around a common architecture for searching and analyzing statistical and numerical data. ChartSearch’s patent-pending suite of [data search technology](#) begins with a platform-neutral enterprise search engine, which enables clients to use natural language queries to instantly search and find statistical/numerical data, extract it on-demand and automatically visualize it in a readily accessible form.

Headquartered in West Orange, NJ, ChartSearch has operations in North America and Europe. For more information: [www.chartsearch.net](http://www.chartsearch.net) or [info@chartsearch.net](mailto:info@chartsearch.net).
